

INTERNATIONAL SCHOOL AWARD 2018-2021

Our maiden journey in the pursuit of ISA started in 2014-2015 and at that time we had experienced a great success by scoring full forty nine points and becoming a proud recipient of ISA (2015-2018). Our second stint this time was challenging on two grounds, (i) that we had to keep up to the standard that we maintained last time and perhaps go higher and (ii) our activities could not have been mere repetition of some of the activities that we undertook last time. We planned out seven activities across the subjects and accordingly submitted the action plans but getting approval was a kind of task this time as we had to restructure certain things as per the suggestions and feedback that we got from the British Council. The action plan was well integrated with the normal activities that happen in the school throughout the year. All of us were excited (primarily the teachers, as the students did not have much role in the planning stage) that we will have an eventful year 2017 with lot of fun and learning experience.

The entire year's hard work resulted in SBA once again getting a full 49 points out of a possible 49 by way of qualifying for this award again!

We wish that anyone who turns the pages of our presentation will be able to live those moments that we have done over the year long session.

We wish to carry on with the ISA story in the years to come...
